Product characteristics

Durable and decorative

- The ideal product for demanding, high-traffic environments such as swimming pools, changing rooms and shower areas.
- Exceptional resistance to water, impact and shocks.
- Meets the highest hygiene requirements due to its non-porous edges and inert surface allowing easy cleaning and maintenance.

Antibacterial Sanitized® grade

Antibacterial Compact

Sanitized® is an efficient and long lasting protection against bacteria, mildew, acarid and moisture, using silver ions. The silver ions contained in the Sanitized® treatment detect, attack and neutralise bacteria.

Tests indicate that treatment with Sanitized® permanently protects the surface against up to 99.9% of bacteria.

Environmental policy

Committed to protecting the environment, Polyrey has an active policy of reducing the impact of its activities during every stage of the manufacturing process and the life cycle of its products. Since 2009, Polyrey has considered the environmental impact of its products: greenhouse gases, energy consumption, water recycling... by means of the Life Cycle Assessment (LCA).

We have also put in place environmental practices which are monitored through a Total Quality Process. Our two industrial sites are ISO 9001 and ISO 14001 certified.

Polyrey commits to delivering all of its panels as PEFC* certified eliminating the need for a special request.

This guarantees to our clients and consumers that the products they are purchasing have been manufactured using wood from sustainably managed forests.

* All our HPL and Compact are at least 30% product mix certified.

Get inspired!

Nine colour combinations to help you design stylish, classic, sophisticated or vibrant environments for all your projects: leisure centres, swimming pools, gyms, schools, golf clubs, etc.
